

ADVANCED MEAL SYSTEMS: *The right solution just got better!*

- **Take control of mealtime with our ClearTouch controller**
From meal-schedule timing to system programming, our new ClearTouch touchscreen controller provides maximum levels of flexibility and precise control.
- **Connect-Rite automatic docking gives you fast, accurate and easy cart-to-dock pairing**
Our new Connect-Rite feature makes cart docking and undocking so easy it's virtually effortless!
- **Remote programming and 24/7 access with our ClearLink Remote Access System**
Check the status of your Connect-Rite® 3 INSIGHT system anytime. Our new ClearLink Remote Access System makes the information you need available, 24/7.

BEST TEMPERATURE PERFORMANCE IN THE INDUSTRY!

It's a fact: Our convection systems keep hot food hot and cold food cold. They're also designed to be used interchangeably with different style Convect-Rite® carts for a variety of foodservice needs. When your hot food is hot – and cold food is cold – you'll deliver delicious, appetizing meals every time.

- For cook-chill retherm and cook-serve boost applications.
- Patented, directed air-flow technology delivers temperature performance from front to back, top to bottom.
- Convect-Rite® carts are ergonomic, fully insulated, and feature our gravity-activated Auto-Therm™ seal that prevents temperature migration when no tray is present.

Connect-Rite provides effortless automatic cart docking

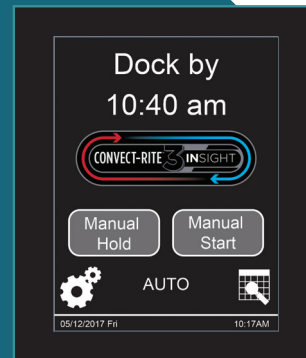

Docking a cart has never been easier! Our new Connect-Rite feature senses the Convect-Rite® cart and automatically pairs it with the docking station. The motorized mechanism provides consistent, tighter cart-dock sealing that is virtually effortless. A single-touch releases the cart when it's time to serve meals to patients.

ClearTouch touchscreen controller

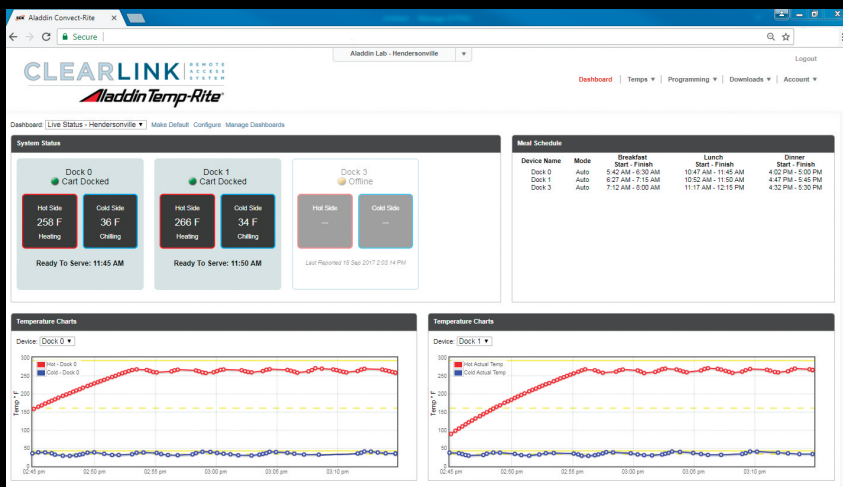

Aladdin's new ClearTouch full-color touchscreen controller sets the standard for easy-to-use, intuitive CONTROL. Its programming capabilities provide maximum flexibility for changing meal types and schedules.

- A simple, easy-to-understand touchscreen interface.
- Visual color indicators in green, yellow and red for instant status recognition.
- Commonly used symbols and icons make employee training easy.
- Descriptive alarms tell users what type of action is needed.
- A diagnostic screen for trouble-shooting.
- Distinct mode for Boost operations.

Aladdin's ClearLink Remote Access System makes information available 24/7

When you're away from the kitchen – don't worry – you can check the status of your Convect-Rite® 3 INSIGHT system 24/7! ClearLink's remote programming capabilities and monitoring exceed those of any other convection meal system in the industry for accessibility, control and ease of use.

- ClearLink provides real-time system status with intuitive drill-down for detailed information.
- Remote programming for schedules, meal profiles and more is at your fingertips!
- Historical data can be viewed/downloaded for HACCP reporting.
- Alert notifications will let you know if conditions fall outside established control limits.
